

PROCESSES & SOLUTIONS GUIDE

DEKKO

MANUFACTURING SOLUTIONS

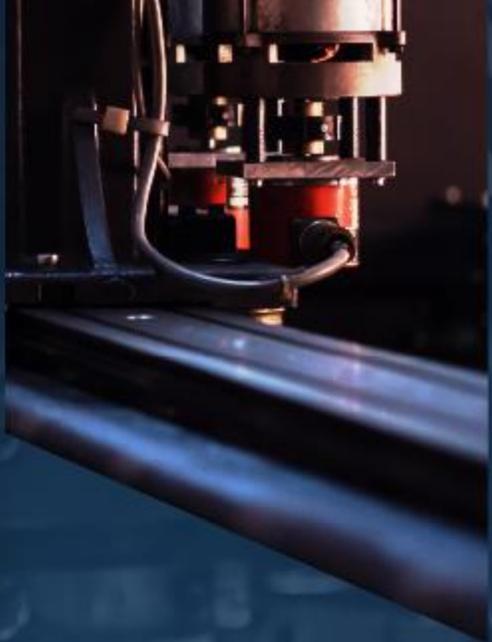

2024

## POWER

---

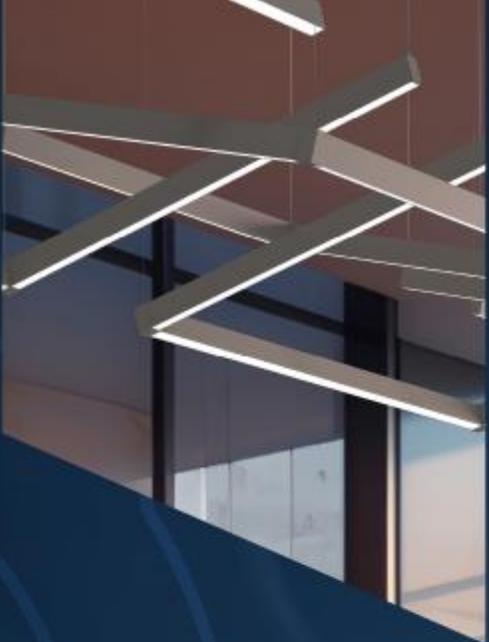

Dekko has positioned itself as a leader of power solutions for Office and Hospitality markets by providing advanced, reliable and superior quality power distribution products.

## MANUFACTURING

---

With broad capabilities, Dekko is able to support companies by providing custom engineering and manufacturing solutions to a variety of markets. Partnering with Dekko means our customers will gain an experienced, responsive, and reliable partner to assist in executing their strategic needs.

## LIGHTING

---

Dekko Lighting creates highly configurable, turnkey, private label, indoor lighting solutions that operate within the workspace, industrial, education, healthcare, commercial and retail, and municipal/government industries.

DIVISIONS  
DEKKO

# LOCAL. GLOBAL. CAPABLE.

# DEKKO

Offering superior capabilities across domestic and international locations, Dekko is positioned to provide rapid and efficient manufacturing solutions for projects of any scale.

## ENGINEERING & DESIGN SERVICES

### Design

- Whether it's your design or ours, we have a talented team of design engineers to help you realize your idea from start to finish.

### Testing

- Our UL certified laboratory can assist with all the necessary approvals needed to start the manufacturing process.

### Prototyping

- Our full line of capabilities includes the ability to create a prototype of your idea, allowing you to go from concept to manufacturing quickly.

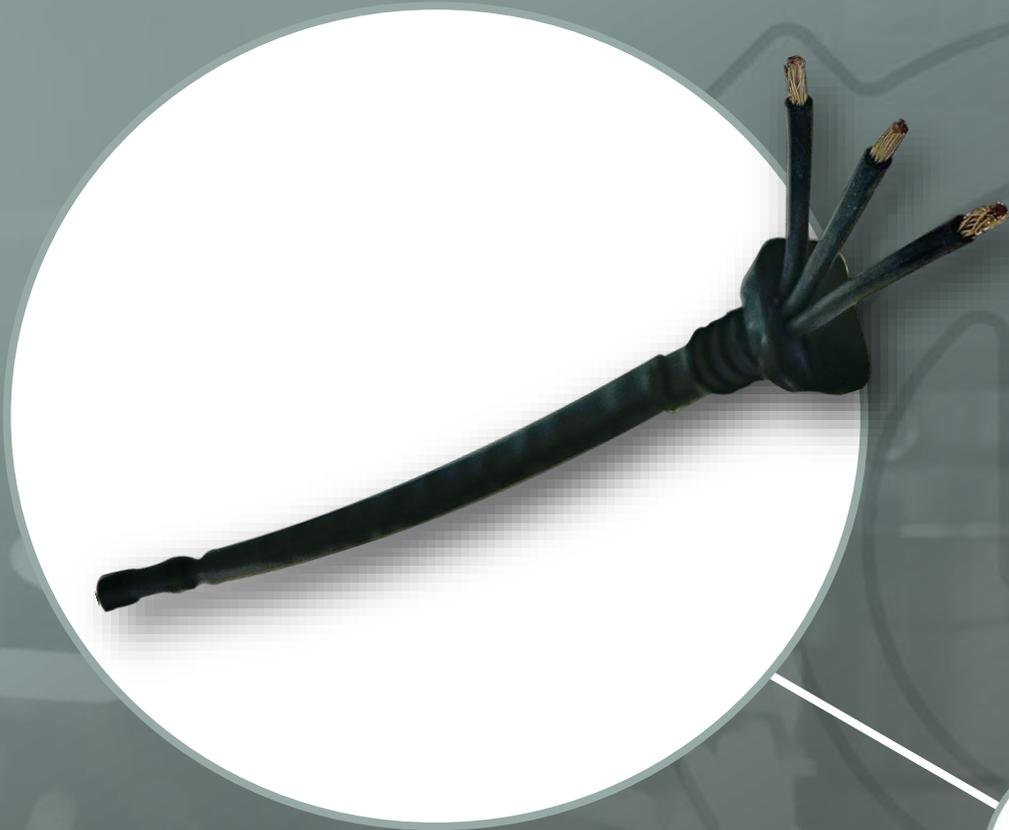

### Certification

- We'll file all the necessary verification paperwork to ensure your product meets UL standards.

# OVERMOLDED WIRING

Dekko overmolding uses state-of-the-art processes and equipment to provide tailored wiring that offers unrivaled durability, reliability and capability in a simple, affordable solution.

## DEKKO ENGINEERED LEAN

At Dekko, we deliver success by utilizing our Tier Operations System and the Plan-Do-Check-Act Process to ensure exceptional results for our customers

- Metrics-Based Decision Making for Efficient Growth
- Leveraging Best-in-Class Tools (Lean & Six Sigma) for Operational Excellence
- Proactive and Efficient Process Management
- Developing a Culture of Continuous Improvement for Sustainable Growth
- Performance based engineering with Precision and Reliability

The background features a dark blue field with faint, light blue gear outlines. On the right side, there is a diagonal split showing a close-up of industrial machinery with bright, glowing lights, possibly from a manufacturing process like casting or welding. The overall aesthetic is technical and industrial.
